Profile

Helsinki based developer with a passion for programming, music and solving problems.

Technical Skill Set

Frontend

- HTML
- CSS
- Javascript
- Bootstrap

Backend

- NodeJS
- Express

Databases

- MongoDB

Other Technologies

- Git
- GitHub
- Heroku

Experience

- **Blog App:** <https://obscure-gorge-97901.herokuapp.com/blogs>
I made this app to reinforce what I learned from Colt Steeles The Web Developer Bootcamp; creating a full-stack app and using RESTful routing. HTML, CSS, Javascript, NodeJS, Express, Bootstrap, authentication with passportJS, MongoDB.
- **Memory Game:** <https://staffanstromsholm.github.io/Memory/>
Memory game I built for my kids. This project was an exercise in implementing game logic. I strived to make the code easy to work with by having an object oriented approach. HTML, CSS Javascript.
- **Todo-list with nested todos:** <https://gentle-depths-61843.herokuapp.com/todos>
Todolist with database, CRUD, and nested todos. This project was an exercise in implementing user authentication and authorization. I also wanted to make it more than a simple todolist so I integrated MongoDB and made it possible to add nested todos. HTML, CSS, Javascript, NodeJS, Express, Bootstrap, MongoDB.
- **Example Landing page:** <https://staffanstromsholm.github.io/landingpage/>
Here I learned more about CSS, using z-indexes, flexbox and bootstrap. HTML, CSS, Bootstrap.
- **Get-temperature app:** <https://frozen-journey-72539.herokuapp.com/>
Get current weather info using a weather API. Built with openweathermap API, HTML, CSS, Javascript, NodeJS, Express

Education and Training

Technical Courses and books:

2020-	Studying full-stack web development React and Node at Business College Helsinki
2019-2020	Udemy Course, The Web Developer Bootcamp
2019-2020	Head First Javascript Programming book
2019-2020	Various youtube tutorials on HTML, CSS, Javascript, React

Languages

Swedish: Mother tongue

English: Very good
